

RECALLED MCQS PATHOLOGY SEPT 2005

Mitochondria which is true:

- a. are not in RBC's
- b. are self replicating

Syphilis

Myelodysplasia

Which is not a DNA virus:

- a. herpes simplex
- b. HIV
- c. CMV
- d. Hep B

Blood Group man can you prove his is father of child with which blood group

- a. cant prove it ie could be O/A/B/AB

Centri-acinar Emphysema assoc with

- a. smoking

Coal causes

- a. Pneumoconiosis
- b. Caplan's Lung
- c. Bronchial Ca
- d. Anthracosis
- e. Pulmonary Fibrosis

Acute coronary syndrome

- a. asymptomatic – low risk
- b. tissue plasminogen activator inhibitor causes extension of thrombus
- c. vessels mostly occluded to decrease blood velocity
- d. increased risk of mechanical stressors
- e. 50-75% occlusion is likely to cause infarction

Aschoff bodies assoc with

- a. Rheumatic Fever

Regarding Electrical Burns

- a. ampage is not important
- b. massive electric shocks usually kill by burns
- c. bone is a good conductor
- d. all human tissues conduct
- e. electrical burns are problematic due to the large amount of tissue destroyed

1 The cause of the greatest number of deaths attributable to smoking is

- A Trachea, lung and bronchus malignancy
- B Ischaemic heart disease
- C Chronic respiratory disease
- D Cerebrovascular disease
- E Oesophageal carcinoma

2 Consequences of lead exposure include all of the following EXCEPT

- A Hypertension
- B Renal failure
- C Polycythemia
- D Encephalopathy
- E Mental deterioration

3 Features of acute radiation syndrome include all of the following EXCEPT

- A Thrombocytopenia
- B Lymphocytopenia
- C Shock
- D Infertility
- E Intractable vomiting

4 Which of the following vitamin deficiencies causes subacute combined degeneration of the spinal cord

- A A
- B B1
- C B2
- D B12
- E K

5 Deficiency of which of the following is responsible for pellagra

- A Thiamine
- B Pyridoxine
- C Folate
- D Riboflavin
- E Niacin

Q	A
1	A
2	C
3	D
4	D
5	E
