

Renal Colic Pathway

Analgesia

**Paracetamol 1g PO +
NSAID (if no contraindication)**
PR Indomethacin 100mg (best option) / PO Ibuprofen 400mg

**Consider opiates if required after initial analgesia/
severe pain**
IN Fentanyl 1.5microg/kg (50-100 microgram per average adult) /
PO Endone 5-10mg
(or IV Morphine, IV Fentanyl)

Consider antiemetic
SL/PO/IV Ondansetron 4mg (or Metoclopramide)

Red Flags

**UTI or Fever (*)
Single Kidney
Renal Transplant
eGFR<70
Age>50**

*simple pyelonephritis does not require imaging

Red Flags need imaging as higher risk patient for urological intervention
